Reporting Student Progress: New province-wide changes this year

The K-12 Student Reporting Policy outlines the requirements for communicating student learning: it requires concise Descriptive Feedback in clear and accessible language to ensure students and families understand where the student is at in their learning, and areas for further growth. The Policy also requires Student Self-Assessment of Core Competencies and Student Goal Setting as part of the reporting process. For Grades K-9 the Policy requires use of the Provincial Proficiency Scale.

Provincial Proficiency Scale – is a scale used to communicate a student’s progress in relation to the learning outcomes, with the following 4 indicators:

- Emerging
- Developing
- Proficient
- Extending

All learners benefit from individualized descriptive feedback and personal involvement in the assessment process. Meaningful and flexible communication of student learning in clear and accessible language enables parents/guardians, students, teachers, and administrators to proactively work together to enhance student learning. This Policy ensures the student and parents/guardians are partners in the dialogue about the student’s learning and the best ways to support and further learning. Students benefit when they and their parents/guardians are made aware of their strengths and areas of needed growth and are provided support early.
